Instructions for Competitor

- Create a folder named **Competitor Number_Your Name**
 - The folder must contain all final files in the format specified in the technical specification.
- You must use all the text provided in the **appendix** for each tasks as specified, **adding or subtracting text from the appendix is not allowed.**
- You may use the image/photo assets that have been provided.
- You may use create raster element or additional vector provided.
- You are **not permitted** to use images/photos from internet or from sources other than provided.

Example of arranging folders on a Competitor's computer:

Module Folder

Module 3

Project Description and Tasks

This module consists of 3 (three) tasks that you have to do. You are **not allowed** to do outside the time limit that has been given.

Briefing of the Project

Brand Name : Teman Tanaman

Introduction

In recent years, the popularity of houseplants has increased significantly, especially among younger generations. This "green lifestyle" trend is more than just a hobby; it's a movement towards creating more lively, aesthetic, and mindful living spaces. Many people want to bring nature indoors but are often held back by one major obstacle: the fear of failure. They perceive plant care as a complex science, which leads to intimidation and negative experiences.

Teman Tanaman was born from a desire to bridge this gap. We believe that caring for plants should not be a source of anxiety, but a source of joy and accomplishment. Our mission is to transform plant care from a difficult chore into a fun and playful hobby. This application is designed to be exactly that: a "plant friend" (*teman tanaman*). It's a friendly guide that provides confidence and simple steps for new plant owners to help their green friends thrive.

Description of the Project

This project is to **design the brand logo, user interface (UI), and user experience (UX)** for the "**Teman Tanaman**" mobile application. The main objective is to create a cohesive brand identity and an engaging, intuitive, and visually delightful experience, especially within the user flow of adding a new plant to their collection.

Target Audience

Audience	: 30% Male / 70% Female
Age Range	: 18-30 years old
Social Class	: Middle-up class (income Rp 7,000,000 - Rp 20,000,000)
General Behavior	: Aesthetic-driven, active on social media (Instagram/Pinterest), beginners in plant care, appreciate simple and beautiful digital tools, interested in wellness and home decor.

Task 1: Logo & Icon Design

Objective

To design a unique and memorable logo for "Teman Tanaman". The logo must be friendly, cheerful, and clearly represent the brand's mission to make plant care a joyful experience.

Requirement

- The logo must incorporate the brand name "**Teman Tanaman**". Capitalization is flexible (e.g., TEMAN TANAMAN, teman tanaman).
- The logo must use a **maximum of three (3) colors**.
- The Logo must be a combination of logogram and logotype.
- The logogram will be used for application icon.

Technical Specifications

Dimension	: 1080 x 1080 px (Logo) : 512 x 512 px (Application Icon)
Image Resolution	: 72 ppi
Color Mode	: RGB
Design element	: Logogram and logotype
Working File Format	: AI (Adobe Illustrator)
Final File Format	: PNG (with transparent background), SVG
Folder Name	: Competitor Number_Module 3
Sub Folder Name	: Task 1
File Name	: Competitor Number_Logo : Competitor Number_App Icon

Provide

Folder & file names as specified in "Instructions for Competitor". Only links & files from this folder will be marked.

1 x AI (Working File, 2 artboard include logo and application icon)
2 x PNG File (Final File)
2 x SVG File (Final File)

Task 2: Low-Fidelity Wireframe

Objective

Create a Low-Fidelity Wireframe to design the fundamental structure, user flow, and information hierarchy of the "Teman Tanaman" application. The focus is purely on functionality and user experience, laying a solid foundation before applying any visual design elements.

Requirement

- Use template provided [Appendix 3 - Template](#).

Technical Specifications

Dimension	: Template provided (1650 x 900 px)
Image Resolution	: 72 ppi
Color Mode	: RGB
Feature	: Radio Button, Clickable and Fillable, Hyperlinks, Page Transition Effect, Pop Up Panel, Menu
Text	: Module_3-Appendix_1
Working File Format	: AI or PSD
Final File Format	: JPG
Folder Name	: Competitor Number_Module 3
Sub Folder Name	: Task 2
File Name	: Competitor Number_Wireframe

Provide

Folder & file names as specified in "Instructions for Competitor". Only links & files from this folder will be marked.

- 1 x PNG File (Final File)
- 1 x AI or PSD (Working File)

Task 3: High-Fidelity Prototype

Objective

Create a High-Fidelity Prototype to transform the low-fidelity wireframe into a complete, visually appealing, and realistic high-fidelity prototype. This task involves applying the brand's visual identity to create a polished and engaging final design.

Requirement

- Apply the logo you have created from Task 1.
- The design must be based on the wireframe from Task 2.
- Use pictures from [Appendix 2 - Images](#)
- Use text from [Module_3-Appendix_1](#).

Technical Specifications

Dimension	: iPhone 16 (393 x 852 px)
Image Resolution	: 72 ppi
Color Mode	: RGB
Feature	: Radio Button, Clickable and Fillable, Hyperlinks, Page Transition Effect, Pop Up Panel, Menu,
Text	: Module_3-Appendix_1
Working File Format	: FIG
Final File Format	: Figma Prototype
Folder Name	: Competitor Number_Module 3
Sub Folder Name	: Task 3
File Name	: Competitor Number_Prototype

Provide

Folder & file names as specified in "Instructions for Competitor". Only links & files from this folder will be marked.

1 x Figma Prototype Link (Final File) - *public view access*

4 x JPG Files (Final Files) - *one for each screen, you can use “_(page number)”*

1 x FIG File (Working File)
