Graphic Design Technology

Day two -Packaging

Briefing of the project

Einführung

Über das Unternehmen Onewave:

WAS: Onewave helps people to be more energized at work and in life.

WARUM: Energie kommt in Wellen: auf aktive/stressige Momente folgen erholsame/erholsame Momente. Dies ist ein natürliches Muster von Höhen und Tiefen, das jeder bei der Arbeit und zu Hause erlebt. Onewave zeigt Einzelpersonen und Organisationen, wie sie ihr Energieniveau strukturell verbessern können, um ihre persönliche Wellenform zu verstehen. Denn Aktivität und Ruhe sind beide gleich wichtig.

WIE: Onewave hat ein Energieprogramm entwickelt, um seine Teilnehmer zu einem gesunden Energiemuster zu führen, und schickt ihnen ein Paket mit allen benötigten Werkzeugen und Materialien. Zu Beginn des Programms messen die Teilnehmer zwei Tage und zwei Nächte lang mit einem Messgerät (Wavebeat) ihre körperlichen Daten (genauer gesagt, die Herzfrequenzschwankungen*). Die Firma Onewave stellt für jeden Tag einen kleinen Energieschub in Form eines Ingwershots (Waveboost) zur Verfügung. Die Messdaten werden in einer Grafik visualisiert und zeigen an, wann sich der Körper in Stress (rot), in Bewegung (blau) oder in Erholung (grün) befindet.

Die Teilnehmer halten ihre Aktivitäten in einem Tagebuch/Logbuch fest. Onewave wertet die gesammelten Daten dann aus. In einem nächsten Schritt leiten Coaches, Spezialisten und Unternehmensentwickler die Teilnehmer an, kleine Anpassungen vorzunehmen, um wesentliche Verbesserungen zu erzielen. Das Ergebnis ist, dass sich die Teilnehmer energiegeladener fühlen.

BRAND MESSAGE: Energized people create more impact

ÜBER DAS TEAM: 2018 gründeten Lieke und Stijn Onewave und ein Jahr später vervollständigte Noortje das Gründungsteam. Gemeinsam kombinieren sie ein tiefgreifendes Verständnis von HR-Strategien, Business- und Stakeholder-Management mit wissenschaftlicher Expertise in den Bereichen Physiologie, Gesundheit, Training, Coaching und Spitzensport.

* Die Herzfrequenzvariation (HRV) beschreibt die Variation des Zeitintervalls zwischen aufeinanderfolgenden Herzschlägen in Millisekunden. Wenn Sie aktiv oder gestresst sind, ist die Zeitspanne zwischen Ihren Herzschlägen sehr gleichmäßig (geringe Variation). Wenn Sie sich ausruhen oder erholen, variiert die Zeitspanne zwischen den Herzschlägen (hohe Variation).

Task to perform

Task 1: Create a wordmark system and stickers >> 1,5 hours

Task 2: Design a packaging for the energy program >> 3,5 hours

Task 3: Design an instruction card >> 1 hour

Total of 6 hours

Zielpublikum

Was ein Teilnehmer über das Programm sagt:

"Das Tolle am Energiemanagement-Programm von Onewave ist, dass es hilft, persönliche, datenbasierte Erkenntnisse in die Tat umzusetzen."

Die Kunden und Teilnehmer des Onewave-Programms sind

- Führungskräfte aus der Wirtschaft (z.B. Persona Henk Jan): Sie wollen ihre Mitarbeiter dabei unterstützen, konzentrierter und energiegeladener zu arbeiten.
- Einzelpersonen (z. B. Persona Jamie Tan): Sie wollen lernen, wie sie energiegeladen bleiben und ihren Weg finden, ihre Energie auszugleichen.

PERSONAS:

- Henk Jan (er/sie), Geschäftsführer eines fair gehandelten Schokoladenherstellers:
 - (a) Hochschulabschluss, Unternehmensentwickler, Vertriebsexperte
 - (b) "Extrem kreativer kaufmännischer Typ".
 - (c) Interessiert sich für Sport, insbesondere Leichtathletik
 - (d) Legt Wert auf faire Arbeitsbedingungen
 - (e) Achtet auf die Umweltauswirkungen
 - (f) Politisch engagiert (liberal)
- Jime Tan (sie/ihr), Angestellter bei einer globalen Wirtschaftsprüfungsgesellschaft:
 - (a) -Postgraduiertenabschluss, Finanzberaterin
 - (b) -Yoga-Enthusiastin und -Lehrerin
 - (c) -Hat einen YouTube-Kanal zum Thema Achtsamkeit
 - (d) -Achtet auf ihre Gesundheit

Description of the Task

Task 1 - Create a wordmark system and stickers

Create

Wordmark system (A) and stickers for the measuring device and ginger shots (B)

You are asked to develop a wordmark (a distinct text-only typographic design of the names) and stickers for the products in the packaging

Create the Wordmark system that defines the typographic design for three different names:

- Onewave: The company name
- Wavebeat: The measuring device that is used to record participants' heart rate variation at the beginning of Onewave's program. The collected data will be further used to analyse their behaviour and daily routines.
- Waveboost: Two small bottles contain ginger shots that participants drink at the beginning of each measuring day.

We provide:

- **ICON:** You will receive the icon of the company Onewave. This should be combined with your wordmark that represents the company. You can modify the icon but it must be recognizable. >>
Appendix_1_icon_onewave.ai
- **TEXT for wordmark Onewave:** The company is called "Onewave". Use this name for your wordmark. No additional text allowed. You can decide if to capitalize or lowercase parts or the entire word.
- **TEXT for wordmark Wavebeat:** The measuring device is called "Wavebeat". Use this name for your wordmark. No additional text allowed. You can decide if to capitalize or lowercase parts or the entire word.
- **TEXT for wordmark Waveboost:** The ginger shots are called "Waveboost". Use this name for your wordmark. No additional text allowed. You can decide if to capitalize or lowercase parts or the entire word.

Note: The logo of the company consists of the wordmark of Onewave and the provided ICON (latter can be modified). You will use this logo in Task 2 and Task 3.

Keep in mind that “Wavebeat” and “Waveboost” are both products of Onewave. Develop a coherent and flexible visual language (wordmark system).

Create the design and shape of the stickers for the measuring device and for the ginger shot bottles.

The DESIGN OF THE STICKER for the measuring device will consist of the wordmark for “Wavebeat” and a creative use of the Onewave ICON. Adapt the shape of the sticker to the form of the measuring device. Create an unexpected shape for the sticker that goes beyond default formats (like simple geometric shapes) but pay attention to the function and the technical specifications as described in the technical specifications. >> Appendix_2_Wellness-BG3-Technical-Specs.pdf

The DESIGN OF THE STICKER for the ginger shot bottles will include your wordmark for “Waveboost”, the text attached and the icons specified below. You are asked to design ONE sticker to use on both bottles. Each bottle of ginger shots will be labelled with the same sticker. Create an unexpected shape for the sticker. The sticker should go beyond default formats but pay attention to the function. Any additional text or graphics are allowed.

We provide (for sticker on ginger shot bottles):

- TEXT for sticker Waveboost: >> Appendix_3_text-sticker.docx
- ICON recycled rPET: >> Appendix_4_icon-recycled-rPET.png
- ICON BPA free: >> Appendix_5_icon-bpa-free-glass-leaf.png

You are free to use images for your design or to create your own illustrations. >> Appendix_6_Pack Images

Produce: Technical Specifications

Technical specifications wordmark system

- Only vector
- Pantone solid uncoated colour – can differ between the three wordmarks, but only use one (1) colour per wordmark

Technical specifications of both stickers

- Colour: max three Pantone colours + die line colour used for your Sticker-Design. Colours can vary between the two stickers but must be properly named.
- Bleed: 2 mm
- Size of the measuring tool is 54 mm x 38 mm x 7,7 mm
- Size: Your choice but it should not overlap on the product
- Die line 0,25 pt max
- One of the graphic elements on each sticker must bleed off

Provide

Digital:

- Original InDesign or Illustrator Document with both Sticker-Designs on one (1) Artboard.
- One PDF/X-3:2002 in A4 format with your wordmark system (3 names)
- One PDF/X-3:2002 in A4 format with bleed and die line of both sticker designs (2). No extra print marks.

Print:

- One A3 landscape print representing both stickers (2) on 300% of its original size.
- Company logo by Onewave and the two wordmarks, with each of them exactly 10 cm at its largest size. Choose the paper size yourself.

Present

Finish all your presentation preparations for Task 1 within 2 hours after the competition starts. No later changes allowed as Task 1 will be assessed already.

Stick your cut-out label in original size on the provided presentation board (A4 black board). And in addition, the two bottles are to be labelled with the sticker.

Task 2: Design a packaging for the energy programme

Create

A packaging design for the energy program

Onewave sends each participant a package with the necessary tools to start the program. The package design should convey the brand image: modern, data-driven, healthy, and energetic.

The package contains:

- 1 measuring device (Wavebeat)
- 2 pads
- 2 ginger shots (Waveboost)
- 1 instruction card

The different parts within the box should be fixed in their position. It is up to you to develop an inlay or to find a solution without any inlay. However, the inlay can be fixed to only three areas with some glue dots.

In order to be able to return the measuring device and the two pads, the participant of the energy program should be able to use the same packaging. Therefore, the packaging should be designed without a hole or any open area.

The following elements must be included in your package design

- Company logo by Onewave (wordmark + icon of your design from Task 1)
- Wordmarks "Wavebeat" and "Waveboost"
- TEXT provided: >> Appendix_7_Task2-Text.docx
- ICON FSC >> Appendix_8_FSC_Logo.jpg
- ICON RECYCLE >> Appendix_9_RECYCLE_Logo.png
- Images: Use a minimum of two provided images on your package design (>> Appendix_6_Pack Images). You may edit and adjust the images according to your design.

The client has specified that the background of your package must not be white.

Produce: Technical Specifications

- Max dimensions of die line: 297 mm × 420 mm
- Max dimensions of die line for optional inlay: 210 mm × 297 mm
- Bleed for die line: 3 mm
- Colours: CMYK + three different spot colours for die line types
- Separate layer for each die line type and separate colours for each of them: respectively call layers and colour swatches "Cut lines", "Fold lines", "Glue dots"
- Only three areas with some glue dots are allowed for the Package (Inlay can have 3 extra glue areas)
- Lines of die line 0,5 pt exactly
- Printed on one side only
- All logos and icons in vector format only
- Both ICON (FSC, Recycle) logos must be 100% colour. No Gradient nor transparency permitted.
- Greyscale and colour image resolution: 144 ppi

Provide

Digital

- One final PDF/X-4:2008 file: including die line, colour bars and registration marks
- One PDF/X-4:2008 file of the inlay, if required.
- Provide a packaged Adobe InDesign or Illustrator folder for submission that includes all fonts and links used.

Print

- One colour printout, reduced to fit on A3 with bleed, including die line and Competitor number outside the artwork area.

Present

One colour mock up (without die line), folded and assembled at actual size (100%), printed on SRA3 card stock.

Task 3: Design an instruction card

Create

Instruction card

Design the layout for the card to explain how to participate at the Onewave program. You can decide based on your packaging size if you create a plain, folded or rolled up card. However, the card has to fit into your packaging. Your design must be in line with your packaging design.

The following elements must be included in your layout:

- Include the company logo Onewave and the wordmark Wavebeat from Task 1
- Include the TEXT on the card. Additional text allowed. >> Appendix_10_Task-3-text.docx
- You are free to additionally create your own illustrations.
- Generate and include the QR-Code from <https://onewave.agency/en/download-app/> >> Appendix_11_generate-QR
- You are free to use any of the supplied images in your card design. >> Appendix_6_Pack Images

Produce: Technical Specifications

- Layout: double sided
- 15 cm max size of one dimension of the open layout
- QR-Code only 100% Black and 25 mm in size (from edge to edge of the black part)
- Use only two Pantone uncoated colours + Black. Colour swatches must be labelled accordingly.
- Greyscale and colour image resolution: 180 ppi

Provide

Digital

- One final composite PDF/X-3:2002 file (including bleed, colour bars, crop marks and fold lines (if needed)). Place your fold lines outside the bleed area in one of the used Pantone uncoated colours.
- Save and package your document for delivery to a printer/service bureau in a folder.

Print

- One double sided printout at 100%, with bleed, crop marks and fold lines (if needed) only.

Present

One double sided printout at 100%, trimmed to size and placed inside the packaging

Instructions to the Competitor

Document Management

Digital Data on your Computer

Create a folder on your desktop called YY_Name-of-TP_DAY_Z , where YY represents the number of your workstation. "Name of TP" represents one of the 4 Test Projects (e.c. Corporate Design, Packaging, ...) and Z the day of competition (1 to 4). The name of the folder does not contain any blanks.

All working, final and packaged files must be included in this folder. There is no other File or Folder on your Desktop.

e.g. : 06_Packaging_DAY_2

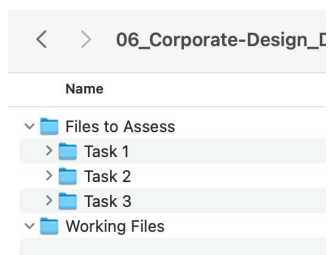

(example for Workstation nr. 06 on the first competition Day)

Files to Assess >> All final and packaged files must be included in the specific "Task n" folder. e. g.: Task 1, Task 2, Task 3

Working files >> The content of this Folder is up to you. Files and Documents in this folder will not be assessed. This folder serves as data storage and to provide a tidy structure in the other folders.

Printout:

You must include your workstation number on the presentation board and printouts for marking and delivery to your workstation (the number should be included outside of the artwork).

Marking Scheme

The Marking Summary will be either provided during the briefing session on C2 or at your workstation.

Appendix

This Test Project paper will be printed out. To prevent too many pages from being printed, we do not list all appendix documents here. You will find them in the folder on your desktop.
