C. General Requirements:

- Test project will be given in English. Dictionary (hardcopy) is allowed during the competition.
- Every module should be provided with proper validation and informative error messages.
- Scrollbar should be visible whenever there are lists or views that occupy more than one screen.
- Use proper naming conventions for variables, functions, or filename.
- By default, form should be displayed in the centre of the screen.
- Whenever a form or dialog is in focus, other form functionality should be disabled.
- Wireframe given in the test project is for reference only. Modifications are allowed if they do not affect the performance and functionality of the requested features.
- Pay attention to given working durations. The time given includes the duration for the submission process. Additional time will not be added during normal conditions.

D. Test Project Detail

Module Name	Duration (Hours)	Requirements
Desktop Application (40%)	3	• Import database and its content from external sources. • Create windows forms and its components based on given requirements. • Validating user input. • Role validation and menu access restriction based on login data. • Show, insert, update, or delete records from the database. • Create windows forms and its components based on given requirements. • Join tables query. • Aggregate query. • Display data using charts.
