This Test Project proposal consists of the following documentation/files:

INTRODUCTION

Java Teak was founded in 2005. On a vacation to Bali the previous year, the owner, Mike, fell in love with the architecture, culture, people, art, and furniture. Upon the return, Mike immediately started shopping for teak furniture for our back patio. Serendipitously, he met a small Bay Area teak dealer who was considering shutting down his business. We offered to take over his company and opened up a small warehouse in Concord, California. Since then, their family has grown from two to four and our business has grown as well.

Java Teak has thrived through the years by focusing on three things: using the highest quality plantation grown grade-A teak available, providing great personal service, and maintaining low overhead which allows us to offer the lowest possible prices on our premium teak furniture. Yes, customers can have all three – service, quality, and value.

Java Teak keep their overhead low by shipping several 40' shipping containers per year directly from their supplier in Central Java to their showroom/warehouse in Newark, California. Instead of operating in a high-profile and expensive retail location they opted for a much less costly light industrial space. Java Teak understand that today's savvy shoppers are doing their research on-line and know how to find them.

Almost 15 years Javateak standing and grow up their business, They realized need to expand the market. The solution are started new operations (or scaled existing ones) through mobile websites and mobile apps. **The reason businesses used mobile apps, mobile apps offer better personalization, easy to sending notification for example a new product launching, new branding experience, and apps can work faster than website.**

DESCRIPTION OF PROJECT AND TASKS

As a large company that has delivered teak wood many times, Java Teak needs a new brand experience to show the product more massive and effective, to consumer. So, Mike as founder of Javateak Furniture realize that and want to have Javateak Furniture expand to mobile apps.

Project:

1. Create a User Interface Mobile Design
2. Create a Mobile Prototyping Presentation

Target group:

- Age : 25-45
- Sex : Male and Female
- Nationality : International
- Social Class : Middle and Upper Class
- Personal Attributes : Open minded, enjoy nature, Simplicity person, new couple and people who want to be made easy when looking at Javateak Furniture products.

INSTRUCTIONS TO THE COMPETITOR

- Create a folder on your Desktop called YY_MOD2 (YY represents the number of your workstation).
- This folder must include the following 2 subfolders:
 1. A folder named “**Final**”: it should contain all of the final files in subfolders **Task 1 & Task 2** with PDF, ICC profile, native files, fonts and linked images.
 2. A folder named “**Original**”: it should contain other files that are not final files used for creating your design.
 3. The color mode of your images will be evaluated in the press/web ready PDF files.
 4. The final resolution and file formats will be assessed in the InDesign files.
 5. The JPG file format is NOT ACCEPTED for images. Only the following file formats are acceptable. TIF / EPS / AI / PSD / DSC 2.0.
 6. Tasks must be created in Adobe Xd (ui design) and Photoshop (collage/montage images).
 7. You must use ALL of the text provided for each task as specified.
 8. You must use ALL of the images specified as per the tasks and you may create any additional raster or vector elements.

Time limit for this test project

The Test Project must be completed in 3 hours

TASK 1: Ui Mobile Design for Javateak Product

For this task, you need to make a user interface design and prototype from user flow journey

Objective

Simple & Effective communication

Requirements for Ui Mobile Design

1. User flow journey:
 - Home - Cover Apps
 - About - Javateak Introduction
 - Product (1) - Bed
 - Product (2) - Rack
 - Product (3) - Table
2. Use text for the Ui mobile design in **Appendix**
3. The design must have a unity, continuity and relationship between all tasks (All Tasks and Module 1 - Brand Guide)
4. Use Adobe Xd Feature: Sticky header, Button, Transition, Scroll
5. Use Javateak logo on top center position in ui mobile design (About, product 1, product 2, and product 3)
6. Use **Template User Flow Journey.ai**

Technical specifications

Text : All text must be converted to outlines.

File Types : Adobe Xd (Working File)

Image Resolution: 72 PPI at 100% in Photoshop

Naming :
File YY_MOD2_Mobile_Design.xd

(Note: YY represents your competitor number)

You must deliver

Folders as specified in “**Instructions to the Competitor**”. Only files from these folders will be Assessed.

- 1 Adobe xd file.

TASK 2: Mobile Prototype Presentation

For this task, you need to make a UI design presentation

Objective

Simple & Effective communication

Requirements for Mobile Prototyping Presentation

- Use **Template User Presentation.indd**

Technical specifications

File Types : Adobe Xd (UI design)
Adobe PDF (UI design Presentation)

Image Resolution : 72 PPI at 100%

Naming :

File	YY_MOD2_Presentation.xd
File	YY_MOD2_Presentation.pdf

You must deliver

Folders as specified in “**Instructions to the Competitor**”. Only files from these folders will be Assessed.

- 1 Adobe xd file.
- 1 Adobe PDF
