Introduction

You are a **Junior Vehicle Artist** at **Ubisoft Ivory Tower** in Lyon.

You will work on the franchise game title "**The Crew Motorfest Season X**". For four days, you will assist your team in a variety of roles: Concept Art, 3D Modelling, UV/Texture, Rigging, Animation, and 3D Game Engine.

You must prioritise, work independently, organise your own work, and problem solve, to meet the deadlines.

The tasks will be modular and only be revealed at the start of each session.

Since the game director has not finalized his vision and direction for the game, the art director will occasionally make ad-hoc requests. Be prepared for unexpected challenges each day.

Description of project and tasks

Each day, you will be given two modules and several tasks to complete. The first module has a 12:00 p.m. deadline, the second module has a 4:00 p.m. deadline.

The tasks will be revealed only at the beginning of each module.

Folder structure and naming conventions:

WSC2024_C1

- WSC2024_TP50_**_M1 [replace ** with your country code e.g. IN, FR, ES etc.]
- WSC2024_TP50_**_M2

WSC2024_C2

- WSC2024_TP50_**_M3
- WSC2024_TP50_**_M4

WSC2024_C3

- WSC2024_TP50_**_M5
- WSC2024_TP50_**_M6

WSC2024_C4

- WSC2024_TP50_**_M7
- WSC2024_TP50_**_M8

You must submit your files to the deliverable folder after each module is completed.

Module 1: Concept Art

Reimagine Camper Van as a food truck of the future in the year 2124.

Theme: Vehicles of the future

Canvas size: 1920 x 1080 pixels, 300 PPI

Format: PSD (Unflattened)

Deliverables

1. A black and white model sheet ([side](#), [3/4 front](#), [3/4 back](#))

Filename: [WSC2024_TP50_**_ModelSheet.PSD](#)

2. A final design concept art in colour (3/4 front)

Filename: [WSC2024_TP50_**_FinalDesign.PSD](#)

Module 2: 3D Sculpting

Create a giant octopus's sculpture, 4.5 metres in height.

Format: ZTL or MUD

Deliverables

1. Sculpt file

Filename: [WSC2024_TP50_**_MinorAsset.ZTL](#) (or .MUD)

Module 3: 3D Modelling

Retopologize the 3D sculpt model and bring it into Maya/Max.

- Triangle budget = 5,000 - 6,000 tris

Deliverables

1. Maya or Max Project

Project Filename: [WSC2024_TP50_**_MinorAsset](#)

Module 4: 3D Modelling

Use your preferred 3D modelling tool to create a detailed and realistic model based on your concept design.

This food truck is used during a carnival race.

You **may** use the base mesh model provided to start your model or create from scratch.

- Vehicle interior is **not** required
- UV or Textures is **not** required
- Triangle budget = 16,000 - 18,000 tris

Deliverables

1. Maya or Max Project

Project Filename: [WSC2024_TP50_**_MajorAsset](#)

Module 5: UV and Textures

Use your preferred tools to unwrap and texture your 3D model. UV unwrap and texture food truck, octopus chef and roof rack based on your integrated design.

- PBR Textures
- Texture size = 2048 x 2048

Deliverables

1. Maya or Max Project
2. Substance 3D Files

Project Filename: [WSC2024_TP50_**_MajorAssetUV](#)

Module 6: SURPRISE! Visit

Reserved for Ubisoft Ivory Tower visit.

Module 7: Rigging and Animation

Use your preferred tools to rig and skin the octopus chef.

- Create 1) idle and 2) attract attention animations.

Format: FBX

Deliverables

1. Check animation in Maya/Max
2. Export FBX

Project Filename: [WSC2024_TP50_**_MajorAssetAnimation](#)

Module 8: Game Engine

Use Unreal Engine to create a playable racing stage.

- Create a beauty shot of your final 3D asset
- Tutorial: Rig race car (self-created) in Maya/Max
- Import self-created and provided 3D models into game engine
- Set up collision physics of race car (self-created)
- Set up NPC actor 1 (NPC race car): set path
- Create a racing stage using provided 3D assets (TBC)
- Blueprint, Chao Physics

Deliverables

2 x Game Engine Project

Project1 Filename: [WSC2024_TP50_**_GameEngine](#) (for beauty shot)

Project2 Filename: [WSC2024_TP50_**_UELYON](#) (for playable racing stage)

Instructions to the Competitor

Competitors must work independently, and problem solve. Apply the knowledge and use the skills acquired from your training. The tasks can be completed in any order, but each module has its own deadline.

Ensure you save your work using the correct filenames and submit your files at the end of every module.

Other

Check module folders for additional resources.
