Software
Microsoft SQL Server Express Edition 2019
SQL Server Management Studio 19.x
Postman for Windows v10.24 or higher
PDF Reader

C. General Requirements

- Test project will be given in English. Dictionary (hardcopy) is allowed during the competition.
- Every module should be provided with proper validation and informative error messages.
- Scrollbar should be visible whenever there are lists or views that occupy more than one screen.
- Use proper naming conventions for variables, functions, or filename.
- By default, form should be displayed in the centre of the screen.
- Whenever a form or dialog is in focus, other form functionality should be disabled.
- Wireframe given in the test project is for reference only. Modifications are allowed if they do not affect the performance and functionality of the requested features.
- The use of code assistant extensions in the IDE (e.g., GitHub Copilot, Tabnine) is strictly prohibited.
- The use of external libraries (e.g., Retrofit, Volley) is strictly prohibited. Participants must use native solutions provided by the respective programming languages.
- For desktop applications, participants must use WinForms with C#, while for Android applications, they must use Kotlin.
- Pay attention to given working durations. The time given includes the duration for the submission process. Additional time will not be added during normal conditions.
